Counting # # ***						
4						
	11					
2	12					
3	13					
4	14					
5	15					
6	16					
7	17					
8	18					
9	19					
10	20					

Teacher. — Review counting from one through twenty. Using objects, have the children count the teens by saying "one ten and one," "one ten and two," and so on. Lead them to discover that the sequence from one through nine remains the same, but that there is a one in front of each number which means "one ten." Children are to write the numbers in the blank spaces.

Money

10 pennies = 1 dime
1 dime = pennies
1 dime is 1 ten

	γ ruille is riell	tens	ones
ONE	ONE		¢
ONE	ONE CENT ONE		¢
ONE	ONE CENT ONE CENT	(land)	¢
ONE	ONE CENT ONE CENT	;) ·	¢
ONE	ONE ONE ONE ONE CENT ONE CENT		¢
ONE	ONE CENT ONE CENT ONE CENT ONE CENT		¢
ONE	ONE CENT ONE CENT ONE CENT ONE CENT ONE		¢
ONE	ONE CENT ONE CENT ONE CENT ONE CENT ONE CENT ONE		¢
ONE	ONE CENT ONE CENT ONE CENT ONE CENT ONE CENT ONE CENT ONE		¢
ONE	ONE		¢

TEACHER. — Before doing this page, discuss with the children how much a lollypop costs, how much a candy bar costs, how much an ice cream cone costs, and so on, until the children realize that they can buy more for a dime than for a penny. Lead the children to see that one dime is ten ones, or one ten. Show them that the one-figure numbers, one through nine, are written in the ones column.

Children should write the number of dimes and cents illustrated in the proper blank spaces, saying "one ten and one more are eleven," and so on. Be sure they understand the ¢ sign.

Counting

tens ones	tens ones	tens ones	tensiones	tensiones
	11	21	31	41
2	12	22	32	42
3	13	23	33	43
4	14	24	34	44
5	15	25	35	45
6	16	26	36	46
7	17	27	37	47
8	18	28	38	48
9	19	29	39	49
10	20	30	40	50

Teacher. — Before doing this page, build a classroom chart from counting objects or dimes and pennies. Write each number on the chart as each object is counted. Lead children to hear the similarity in "four tens" and "for-ty," "five tens" and "fif-ty," and so on.

Children should count the number of tens and ones in each number above and place the numbers under the correct columns of spaces.

More Counting

tensione	tens ones	tensiones	tens ones	tensiones
51	61	71	81	91
52	62	72	82	92
53	63	73	83	93
54	64	74	84	94
55	65	75	85	95
56	66	76	86	96
57	67	77	87	97
58	68	78	88	98
59	69	79	89	99
60	70	80	90	

Teacher. — Children should continue to count objects and make a number chart to 100. When they get to nine tens and nine ones, use objects to show why they will need a third column, which is the hundreds column. Show them how to write 100.

PIOP COU	Inting Money (tensione)	
ONE DIME DIME	ONE CENT ONE CENT ONE CENT ONE CENT ONE	¢
ONE DIME ONE DIME ONE DIME ONE DIME ONE DIME	ONE CENT ONE CENT ONE CENT	¢
ONE DIME ONE DIME ONE DIME ONE DIME ONE DIME ONE DIME		¢
ONE	ONE CENT ONE CENT ONE CENT	¢
ONE DIME ONE DIME ONE DIME	ONE ONE CENT ONE	¢
ONE	ONE CENT ONE CENT ONE CENT ONE CENT	¢
BANK	ONE CENT ONE CENT	¢

Teacher. — Children are to write the correct numbers of dimes and cents in the proper columns at the right. Be sure that they know a dime is ten ones, or one ten, and is written in the tens column.

Subtraction

Jack had 4 marbles. He lost 1 marble. How many did he have left?

Subtract these numbers.

Find the Answers

Problems

Jane had 4 jacks. She lost 3 jacks.
How many jacks did she have left?.....

4 -3 **4 -3** -3

4 -3

Dick had 6 marbles. He lost 5 marbles. How many marbles did he have left?

-5

- 6 - 5

-<u>6</u>

Mary had 5 dolls. She lost 4 dolls. How many dolls did she have left?

-<u>4</u>

-<u>4</u>

- 4

-<u>4</u>

7 birds were in a tree. 6 of the birds flew away. How many birds were left? _____

Adding Zero

Bob made 5 runs in a game of ball.
In the next game he made I more run.
How many runs did Bob make?...

5 and / are

5 5 5 -1 +1 +1

Mary made 7 runs in a game of ball. In the next game she made nothing. How many runs did Mary make?.....

7 and nothing are $+\frac{7}{0} + \frac{7}{0} + \frac{7}{0} + \frac{7}{0} + \frac{7}{0}$

O is nothing. Zero is nothing. O is Zero. Zero is O.

Sam made 4 runs in a game of ball. In the next game he made nothing. How many runs did Sam make?.....

4 and nothing are +0 +0 +0 +0

Teacher. — Before beginning the work on this page, use objects to demonstrate the difference between adding one more and adding nothing more.

Adding Other Zero Numbers

5 and 0 are, so 0 and 5 are 7 and 0 are, so 0 and 7 are 2 and 0 are, so 0 and 2 are 4 and 0 are, so 0 and 4 are and 0 are, so 0 and | are 9 and 0 are ____, so 0 and 9 are ____ 6 and 0 are, so 0 and 6 are 3 and 0 are, so 0 and 3 are 8 and 0 are, so 0 and 8 are

Add These Zero Numbers

0 2

0 5

Test Add These Numbers

Subtracting Zero

Tom had 5 pennies. He spent 5 pennies. How many pennies did he have left?.....

Judy had 5 pennies. She spent nothing. How many pennies did she have left?.....

Jim had 7 marbles. He lost his 7 marbles. How many marbles did he have left?.....

Betty had 7 marbles. She lost none of her marbles. How many marbles did she have left?.....

$$-\frac{7}{0}$$

Teacher. — Use objects to show how many are left when none are taken away from a specific number, and when the whole amount is taken away.

Children should read the page orally, then write in the answers.

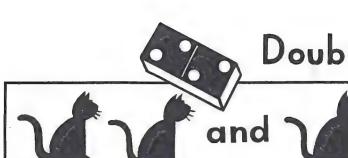

Subtracting Other Zero Numbers

7 take away 7 is, so 7 take away 0 is 9 take away 9 is.....so 9 take away 0 is..... 4 take away 4 isso 4 take away 0 is I take away I is, so I take away 0 is 3 take away 3 is....., so 3 take away 0 is...... 6 take away 6 is, so 6 take away 0 is 8 take away 8 is so 8 take away 0 is 2 take away 2 is, so 2 take away 0 is 5 take away 5 is so 5 take away 0 is

Set I - Practice Cards

2 + 2	4 - 2	5+5	
3+3	5 3	6 -6	12-6

Teacher. — The children may make separate practice cards on heavier paper by using this page as a pattern. On one side they should write the combination, on the reverse its answer. These cards are to be used as practice cards. The children should study the various combinations by themselves. After sufficient time is allowed, they may then test their neighbors and have their neighbors test them. Encourage the children to teach themselves by learning the answers without having to count to find the answer. The teacher should then test the children. When the teacher is satisfied that the children know these combinations, she may ask them to color the picture for Set 1 on the chart on page 126.

Problems

Jim had 10 cookies. He ate 2 cookies. How many cookies did he have left?

Bob had 8 tops. He bought 2 more tops. How many tops did he have then?

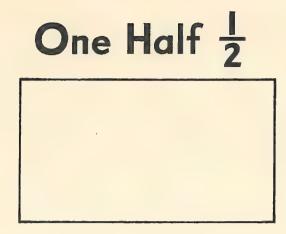

Jane had 7 birds. One day 5 birds flew away. How many birds were left?

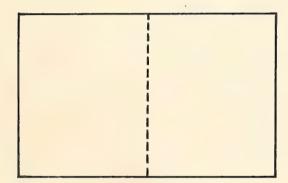

Mary had 5 dollars. Mother gave her 2 more dollars. How many dollars did Mary have?

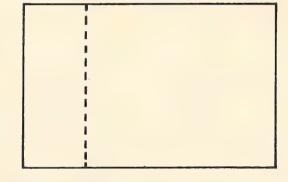

Ann had 7 books. She read 2 of them. How many more books does she have to read?

You have been given a piece of paper like this. Fold your paper into 2 parts.

Tom folded his paper Mary folded her paper like this.

Each part is ½ Write ½ in each part. Why?

like this.

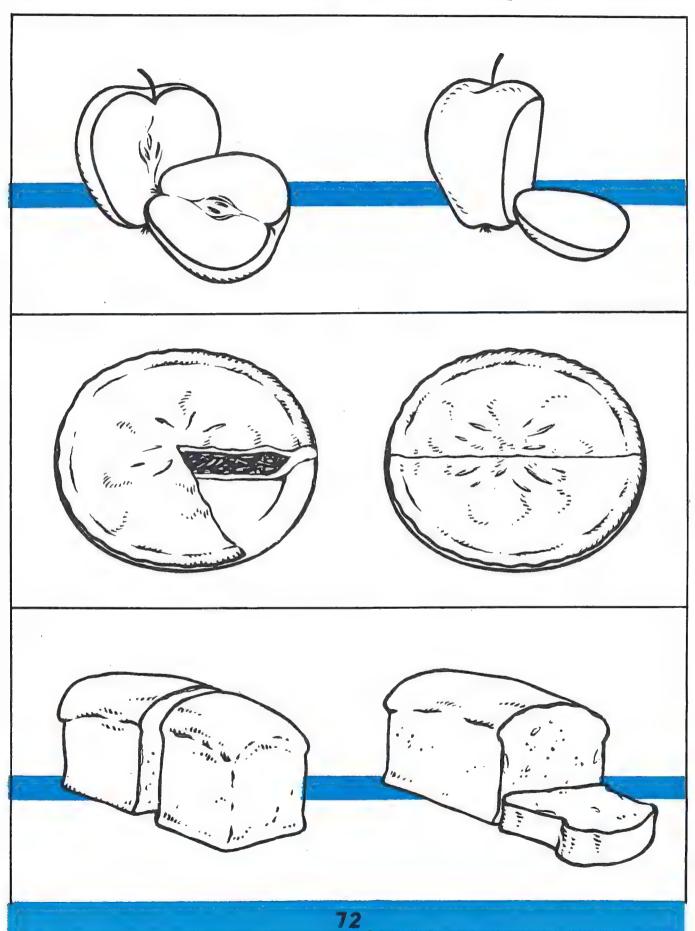

Is each part ½?

When we divide something into 2 parts which are the same size, each part is called one half. One half is written 2

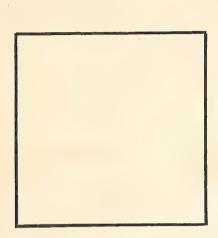

Teacher. — Give each child a piece of paper and ask to have it folded into two parts. Hold up the papers of different children, and let the class decide which are folded in half and why.

The children are to read this page orally.

Which are cut in half? Color only the halves.

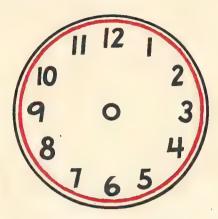

One Half 2

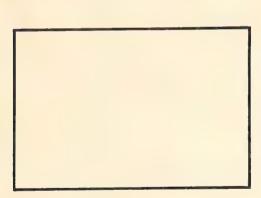

Draw a line to make 2 halves.

Write ½ in each part. Color of the square.

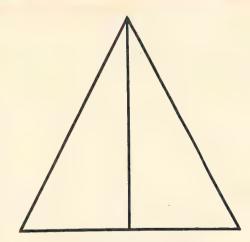

Draw a line from the 12 to the 6 to make 2 halves.

Write ½ in each part. Color fof the clock.

Draw a line to make The line makes 2 2 halves.

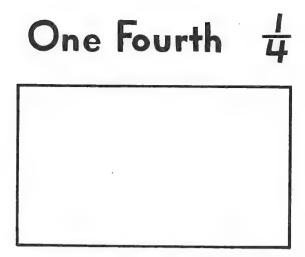

Write ½ in eachpart. Color & of the rectangle.

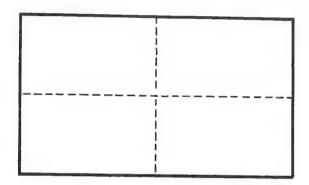

halves.

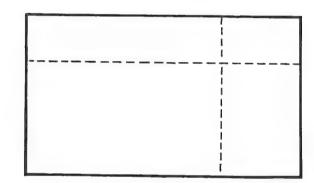

Write ½ in each part. Color & of the triangle.

TEACHER. — Allow the children to discuss the difference in shape of the square, circle, rectangle, and triangle. The children are to read this page orally.

You have been given a piece of paper like this. Fold your paper into 4 parts.

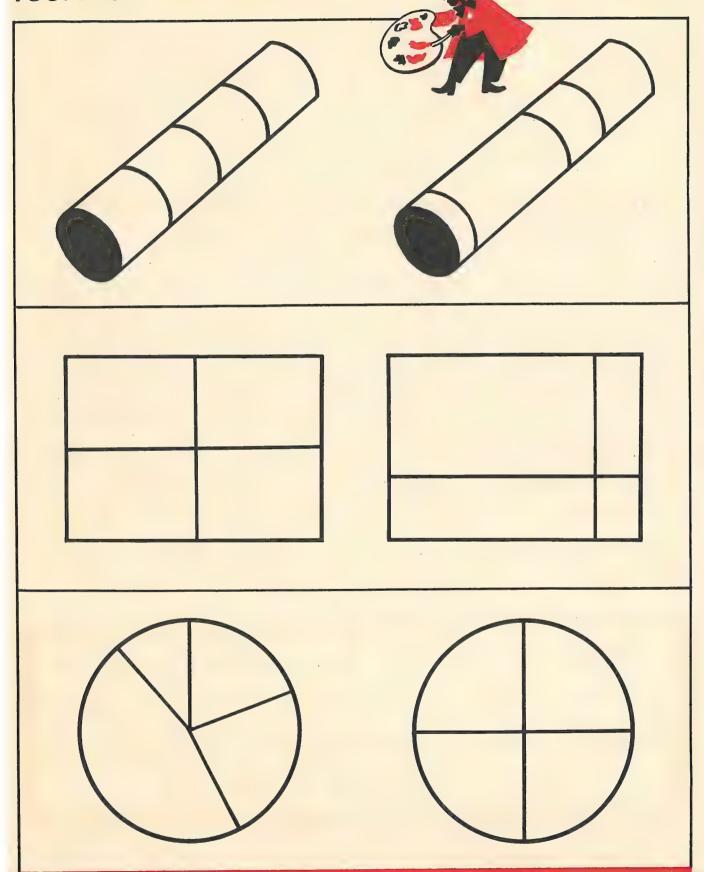

like this. Each part is 4 Write 4 in each part. Why?

Bob folded his paper Jane folded her paper like this. Is each part a 4?

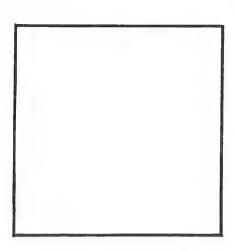

When we divide something into 4 parts which are the same size, each part is called one fourth or one quarter. One fourth is written #

Teacher. — Give each child a piece of paper and ask to have it folded into four parts. Hold up the papers of different children and let the class decide which are folded into fourths and why. The children are to read this page orally.

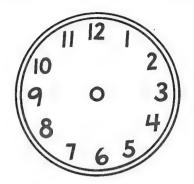

Which are cut into fourths? Color only the fourths.

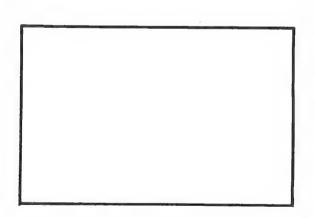

One Fourth 4

Draw lines to make 4 fourths.
Write ‡ in each part.
Color ‡ of the square.

Draw a line from the 12 to the 6
Draw a line from the 9 to the 3
Write 4 in each part.
Color 4 of the clock.

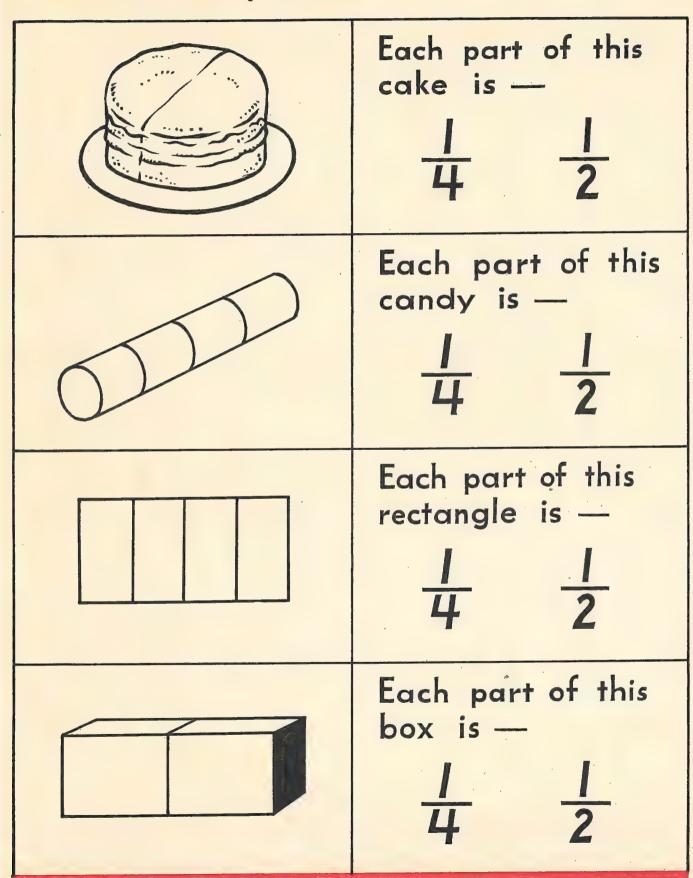

Draw lines to make
4 fourths.
Write $\frac{1}{4}$ in each part.
Color $\frac{1}{4}$ of the rectangle.

Draw lines to make
4 fourths.
Write ‡ in each part.
Color ‡ of the cake.

Draw a line around the right answer.

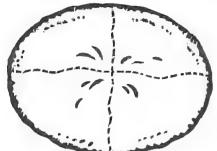

Color the pictures.

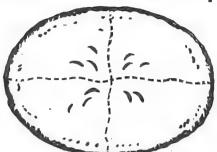

How Big?

Which is larger? Which is smaller?

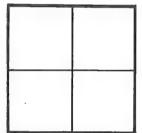

Color $\frac{1}{2}$ of this pie.	Color # of this pie
----------------------------------	---------------------

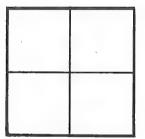

Which is larger? $\frac{1}{4}$ $\frac{1}{2}$

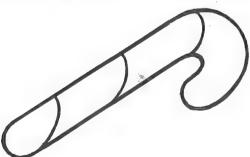

Color # of this square. Color ½ of this square.

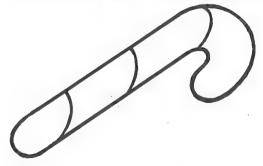

Which is smaller? $\frac{1}{4}$ $\frac{1}{2}$

Color ½ of this candy. Color 4 of this candy.

Which is larger?

<u>|</u>

 $\frac{1}{2}$

Teacher. — As examples, use objects or the pupils themselves to demonstrate the meaning of larger and smaller. The children are to read this page orally. They should then draw a line around each correct answer.

Can You Tell Time?

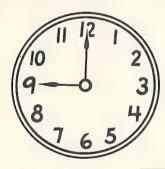

A Riddle – What has a face and 2 hands, but no body?

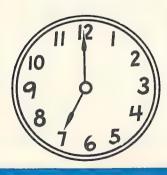

A clock has a face and 2 hands. It has a long hand and a short hand.

The long hand is the minute hand.
The short hand is the hour hand.

Teacher. — The children should make clocks of paper plates or cardboard. The hands may be fastened with a round head fastener, so that the hands can move. Have the children write the hours on their clocks.

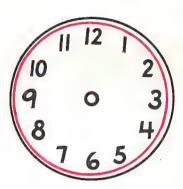

The children should read this page orally, and then fill in the blanks in the boxes.

When the long minute hand is at 12 the clock says <u>o'clock</u>.

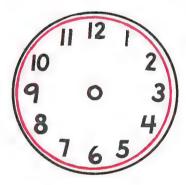

Draw the hands so the clocks will tell time.

4 o'clock

8 o'clock

10 o'clock

6 o'clock

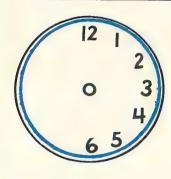

7 o'clock

2 o'clock

Half Past

Drawa line from the 12 to the 6 to make 2 halves.

Each part is

Color the half where the numbers are.

The long minute hand starts at the <u>12</u>
It goes around and around the clock.
When it gets to the <u>6</u>, it has gone <u>half</u> way around the clock.

Draw the long minute hand at the 6 with your black crayon.

When the long minute hand is at the 6 the clock says half past.

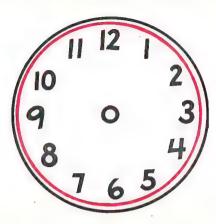

The long minute hand is at the

The short hour hand is past the

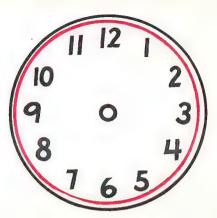

It is half past......

Teacher. — Show the children the direction in which the hands move. Let them move the long hand all around the clock to make a complete circle, then halfway round to the six, starting always at the twelve. Direct their attention to the short hand, and be sure that they understand why it is always past one number and on the way to the next number.

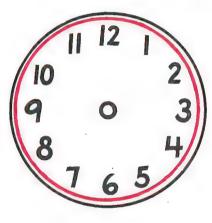

Draw the hands so the clock says -

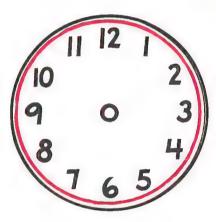

half past 4

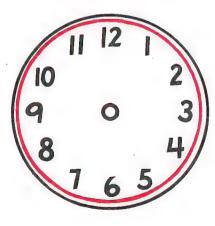

half past 7

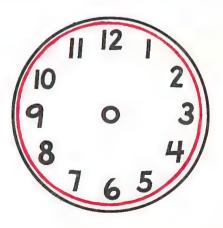

half past 9

half past 3

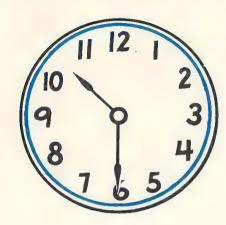

half past 2

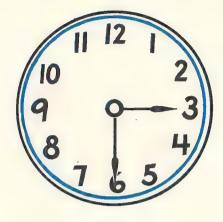

half past 12

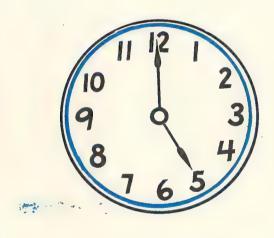

What time is it?

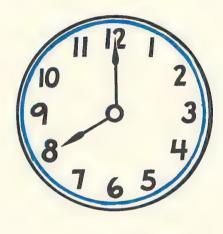

half past.....

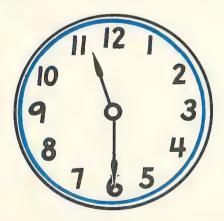

half past.....

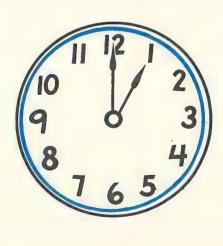

....o′clock

.....o'clock

- I. The boy has a penny letter valentine

 2. What month is it?
- January February March
 3. When is Valentine's Day? Draw a red line around it on this calendar.
- 4. When is Abraham Lincoln's Birthday? Drawa blue line around it.
- 5. When is George Washington's Birthday? Draw a green line around it.

More Addition

Add and Check

Add down. Then add up to see if you are right.

 2

Subtract

Subtract-Then add to see if you are right.

Let the children do several examples on the board and then check them to see if they are correct.

Teacher. — Demonstrate on the board how to check, by covering the minuend with the hand, then adding the subtrahend and the answer to get the minuend.

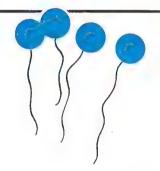

Problems

Bill bought an ice cream cone for 6° and candy for 3° . How much did Bill spend?

____9

Jill needs 10 balloons. She has 4 balloons. How many more does she need?

Nan has 5 little dolls and 4 big dolls. How many dolls does she have in all?

Dan had 10 marbles. He lost 7 marbles. How many did he have left?

Teacher. — The class should read this page orally.

A Thermometer

1. What is the temperature in this room?

2. Color the

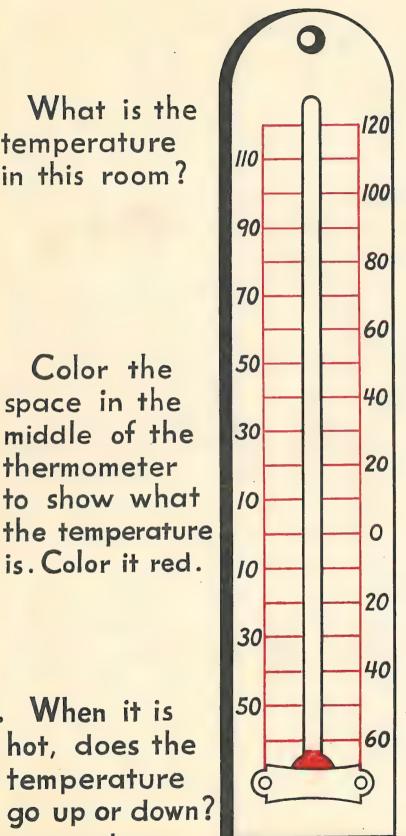

space in the

thermometer

middle of the

to show what

is. Color it red.

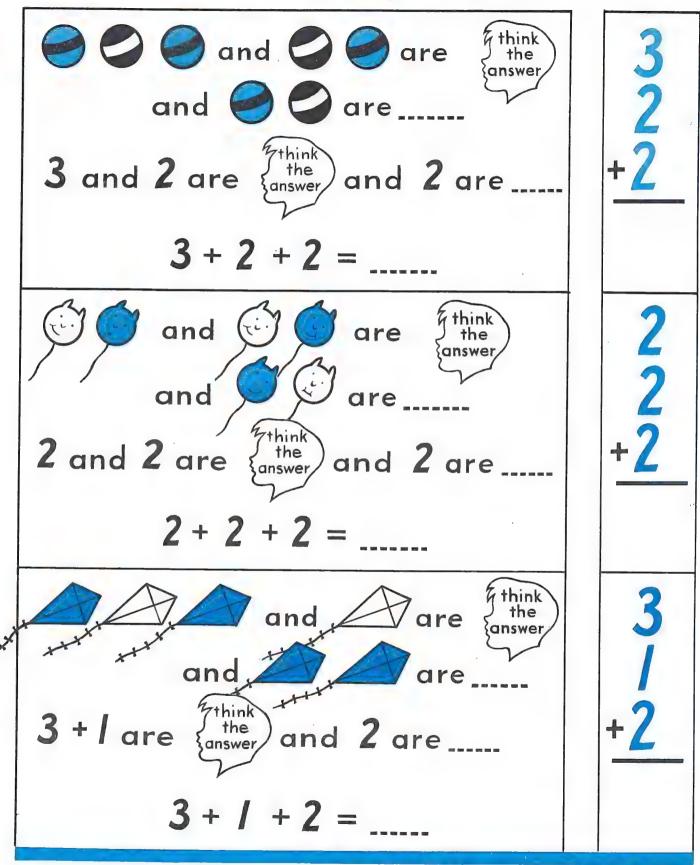

- 4. When it is cold, does the temperature go up or down? up down
- 5. Draw a blue line to show what the temperature may be in July.

3. When it is hot, does the temperature go up or down? up down

Draw a green line to show what the temperature may be in January.

A New Way to Add

Teacher. — Let the children work several examples on the board.

Addition

Add down, then add up.

 3 1 6

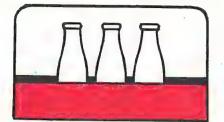

3 4 3

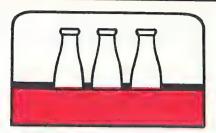

5 | 4

2 2 6

 4 4 2

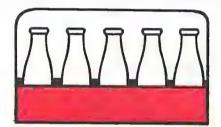

A Shorter Way to Add

There are _____bottles in each box.
There are ____boxes of 3 bottles.
There are ____3's
3 and 3 are ____
two 3's are ____

There are _____bottles in each box.
There are ____boxes of 5 bottles.
There are ____5's

5 and 5 are ____
two 5's are ____

1 and 1 are ____ 4 and 4 are ____ 2 and 2 are ____ 6 and 6 are ____

Two I's are _____
Two 4's are ____
Two 2's are ____
Two 6's are

Teacher. — Before doing this page, use objects to demonstrate the short way to combine groups of equal value. Children should use the words, "two 1's," "two 2's," etc.

Roman Numbers

Some books and some clocks use Roman numbers.

Remember these 3 Roman numbers.

I is I 5 is V 10 is X

Write these Roman numbers.

J ____ *5* ___ *10* ____

You can make other Roman numbers from these three Roman numbers.

Two I's are _____ 2 is made like this. II

Three I's are ____ 3 is made like this. III

One number before 5 is 4 is made like this. IV

5 is
5 and 1 are
6 is made like this. VI
5 and two 1's are
7 is made like this. VII
5 and three 1's are
8 is made like this. VIII

One number before 10 is 9 is made like this. IX

10 is
10 and 1 are 11 is made like this. XI
10 and two 1's are 12 is made like this. XII

Teacher. — Children should read this page orally. Develop the understanding that the three Roman numbers — I, V, and X — are arranged in certain ways and combinations to make all the other numerical values.

Roman Numbers

Write the Roman numbers.

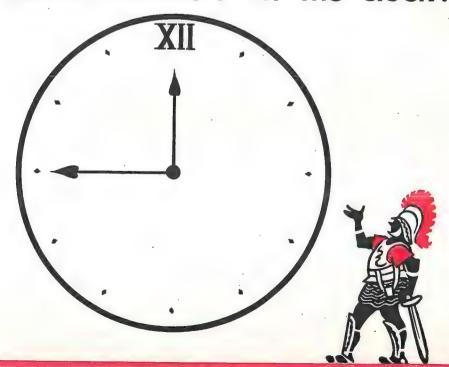

1		4	7	10
2		5	8	11
3	***********	6	9	12

Write the numbers for these Roman numbers.

VIII	 X	XI	VII
V	 II	VI	IX
I	 IV	III	XII

Write the Roman numbers.

Write the Roman numbers on the clock.

Money

This is a penny.

This is a dime.

A dime is ____ pennies.

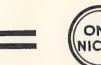

10 pennies are ____ dime.

10 pennies are ____ ¢

B

5 pennies are 1 nickel. 1 nickel is pennies.

nickel is

This costs.....nickelpennies

This costs..... nickel pennies

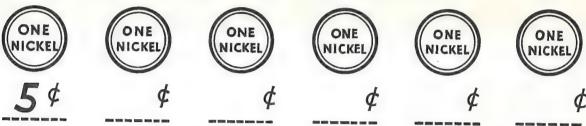

This costs¢
.....dime
.....nickel
.....pennies

Money

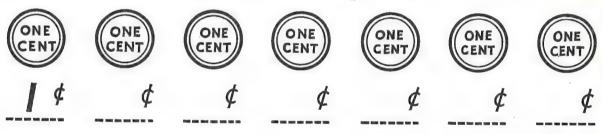

Count these dimes by 10's.

Count these nickels by 5's.

Count these pennies by I's.

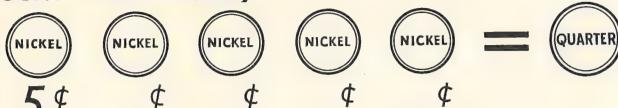

Sam has a nickel. He buys a balloon for 2^{ϕ} . How much change does he get?

Mary has a dime. She buys an ice cream cone for $7^{\, \sharp}$. How much change does she get?

Money

Count this money.

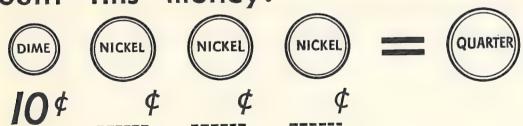

5 nickels make / quarter.
5 nickels are ____ ¢
1 quarter is ____ ¢

Count this money.

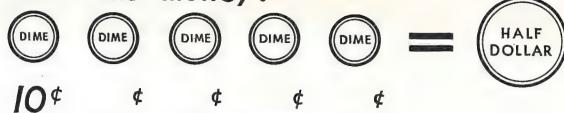

dimes and _____ nickel = 25° dimes and ____ nickel = I quarter.

Count this money.

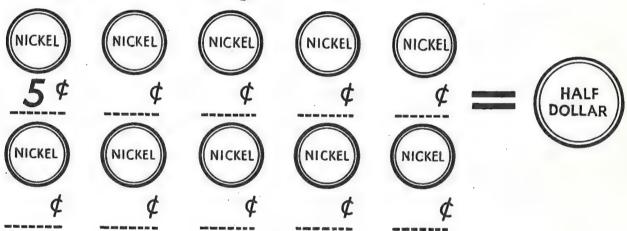

dime and ____ nickels = 25° dime and ___ nickels = I quarter.

Count	this	money.

5 dimes are _____[¢]
1 half dollar is ____[¢]
5 dimes make ____ half dollar.

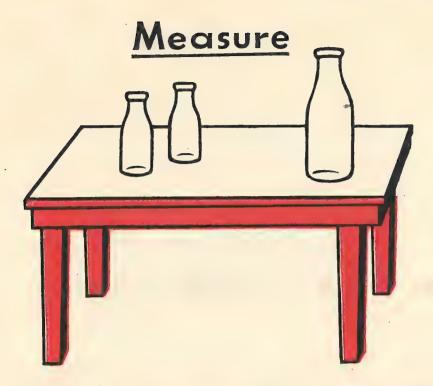

Count this money.

10 nickels make _____ ¢
10 nickels make ____ half dollar.

John had 50¢. He spent 30¢. How much change did he get?

Take a quart bottle and 2 pint bottles. Fill one pint bottle with water. Pour the water into the quart bottle.

Is the quart bottle filled? Yes No

Fill the other pint bottle and pour it into the quart bottle.

Is the quart bottle filled now? Yes No

How many pint bottles did you fill before the quart bottle was filled?
It takes ____ pints to make / quart.

I quart is the same as ____ pints.

Teacher. — The class should read this page orally. Let the children bring two pint bottles and a quart bottle to school and then follow the directions on the page.

Fill a glass with water and pour the water into the pint bottle.

Is the pint bottle filled? Yes No

Fill the other glass with water and pour the water into the pint bottle.

Is the pint bottle filled now? Yes No

How many glasses did you fill before the pint bottle was filled?

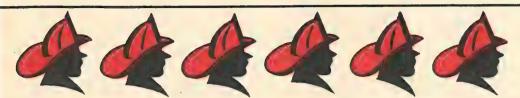

It takes _____ glasses to make I pint.

I pint is the same as _____ glasses.

I quart is the same as ____ glasses.

Teacher. — Have the class read the page orally. Have glasses and pint bottle at hand. Let the children follow the directions on the page.

How Many?

Here are ____ firemen.

Draw a line around the first 2 firemen.

Draw a line around the next 2 firemen.

Draw a line around the last 2 firemen.

There are ____2's in 6

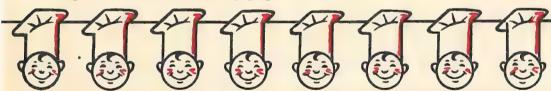

Here are ____ policemen.

Draw a line around the first 3 policemen.

Draw a line around the next3 policemen.

Draw a line around the last 3 policemen.

There are _____ 3's in 9

Here are ____cooks.

Draw a line around the first 2 cooks.

Draw a line around the second 2 cooks.

Draw a line around the next 2 cooks.

Draw a line around the last 2 cooks.

There are _____ 2's in 8

Addition Test

Add down, then add up.

Addition Test

Add down, then add up.

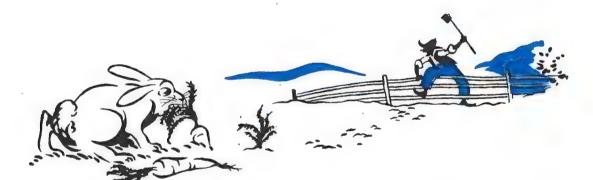

$$0 + 8 = ...$$

Subtraction Test

Subtract, then add.

$$2 \text{ from } 10 = 6 \text{ from } 10 = 10$$

$$9 = 4 \text{ from } 8 = 8$$

8 from
$$16 = 3$$
 from $10 = 10$

$$0 \text{ from } 8 = 7 \text{ from } 9 = 1$$

8 from
$$9 = 6$$
 from $7 = 6$

More Things to Do

1. Use a ruler.

Measure this book.

Measure your desk.

Measure some paper.

Measure other things.

2. Use a scale.

Weigh some coffee.

Weigh some sugar.

Weigh some potatoes.

Weigh other things.

How much do you weigh?

3. Go shopping for your mother.

Find out how much things cost.

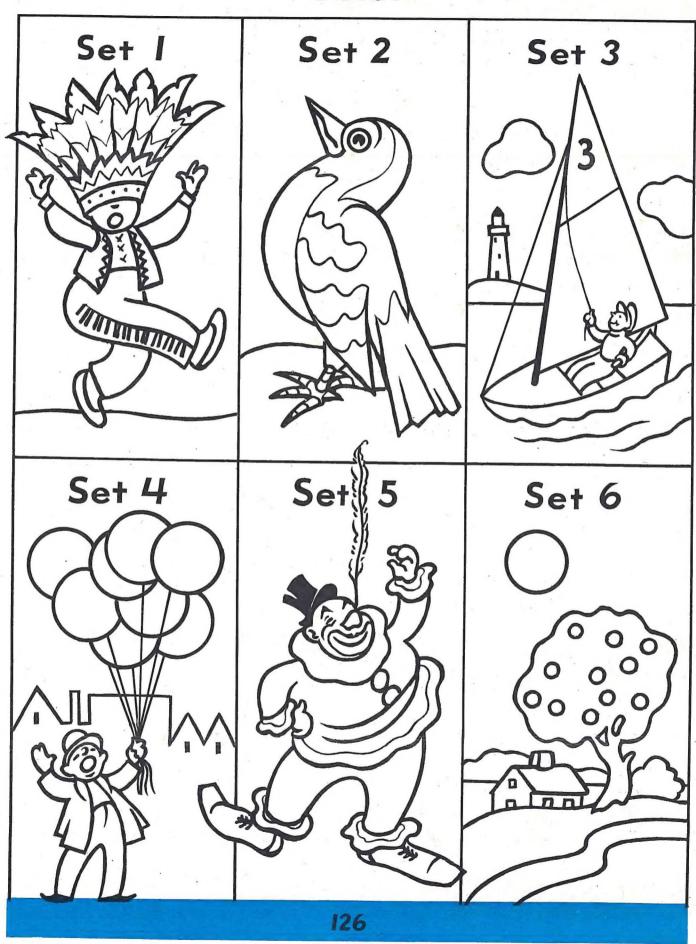

Pay for them.

Count your change.
